Profile Summary

Generative AI & Data Analytics Professional with expertise in RAG, LLM optimization, and Agentic AI frameworks (CrewAI, AutoGen, LangGraph). Proficient in LangChain, Transformers, and vector databases to develop scalable AI-driven workflows.

Experience

Whiteklay Technologies

Nov 2025 – Present

Software Development Engineer - I

- **Monitored 50+ production data pipelines** across telecom and insurance using SQL-based validation and job-monitoring tools, **maintaining 98%+ SLA adherence** for overnight data delivery — direct experience relevant to RAG pipeline uptime and LLM inference monitoring.
- **Delivered and validated production data across multiple downstream workflows**, using SQL and pipeline monitoring, which improved data accuracy and reduced the risk of incomplete client deliveries.

Meta Scifor Technologies

Nov 2023 – Nov 2024

Machine Learning Intern

Bangalore

- Developed machine learning models using Python and Scikit-Learn, focusing on data preprocessing, feature engineering, and exploratory data analysis.
- Evaluated model performance and optimized algorithms, improving accuracy up to 95%.

Projects

Domain-Adaptive RAG Chatbot | *LangChain, ChromaDB* | Github

Sept 2025

- Developed an AI-powered Document Intelligence System using LangChain, ChromaDB, and OpenAI GPT that enables users to upload, query, and interact with PDFs/TXT files through a Streamlit-based conversational interface.
- Engineered a Retrieval-Augmented Generation (RAG) pipeline with automated text embedding, contextual retrieval, and dynamic domain adaptation, delivering accurate, real-time insights from diverse documents such as legal contracts, research papers, and religious texts.

AI Research Crew | *CrewAI, FAISS* | Github

July 2025

- Built a multi-agent research system using CrewAI, LangChain, and FAISS where autonomous agents collaborate to plan, retrieve, synthesize, and review responses efficiently.
- Integrated OpenAI LLMs, vector-based retrieval, and web search tools; implemented task orchestration, memory persistence, and time-limited iterations for robust automated research workflows.

Key Skills

Machine Learning & Data Science: Data Cleaning, Preprocessing, Model Development (Supervised & Unsupervised), Model Evaluation, Hyperparameter Optimization.

Artificial Intelligence & Generative AI : LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering, Natural Language Processing (NLP), Transformer Architectures, GPT-5, Gemini, LoRA, Fine-tuning, Multi-modal Prompting.

Agentic AI Frameworks & Vector Databases : CrewAI, AutoGen, LangGraph, FAISS, Pinecone, ChromaDB, Semantic Search, Tool Orchestration, Memory-based Agents.

Data Analysis: Python (pandas, numpy), SQL, Excel, Power BI, Data Storytelling, Dashboard Design.

Soft Skills: Analytical Thinking, Attention to Detail, Documentation, Cross-team Collaboration.

Education

Vellore Institute of Technology(CGPA: 7.78)

2019 – 2024

Integrated Mtech Specialization in Data Science

Vellore, TamilNadu

Languages

English, Hindi, Telugu

Training and Certifications

Coding Ninjas

July 2024 – July 2025

Certifications:

- **Data Analytics Certification** — [View Certificate](#)
- **Machine Learning Certification** — [View Certificate](#)
